Profile summary

Senior Business Analyst with 3+ years of experience in requirements gathering, business process analysis, stakeholder management, and data-driven decision support. Skilled in translating business requirements into BRD/FRD documentation, scalable analytical workflows, and interactive dashboards using SQL, Python, Databricks, Tableau, and Power BI. Proven track record in gap analysis, root cause analysis, UAT coordination, and reporting automation across marketing, sales, operations, and gaming/LiveOps domains. Experienced working in Agile/Scrum environments, partnering with cross-functional teams to deliver measurable business impact and process improvements.

Skills: SQL, MS SQL Server, Python, PySpark, Databricks, Tableau, Power BI, Advanced Excel, ETL, Data Cleaning, Data Modeling, KPI Dashboards, Reporting Automation, Root Cause Analysis, MySQL

Work experience

Senior Business Analyst — Affine Analytics	Oct 2024 - Present
- Analyze business and player data using SQL, Databricks, Power BI, and Tableau to generate actionable insights. - Develop dashboards to monitor KPIs, track monetization and player engagement, and support LiveOps analytics. - Conduct ad-hoc analysis, troubleshooting, and root cause analysis to support monetization strategy decisions. - Collaborate with cross-functional stakeholders and analytics teams to deliver accurate reporting and insights. - Automate recurring reporting and dashboard workflows to reduce turnaround time for weekly and monthly business reviews.	

Technical Research Analyst — Intellipaath Software Solutions	Aug 2022 - Jan 2024
- Resolved complex data problems using MS SQL and Python, improving operational efficiency. - Built interactive dashboards in Power BI and Tableau to drive real-time decision-making. - Transformed CRM and support data into actionable insights to inform business strategies. - Reduced reporting time through automated dashboards and improved visual storytelling. - Collaborated with marketing, sales, and operations to ensure data accuracy and consistency.	

Projects

Agent Performance Analysis	6 Months
- Integrated Zoho Desk and CRM data into MS SQL Server for agent performance and sales trend analysis. - Performed large-scale data wrangling to create clean analytical datasets for reporting. - Built weekly, monthly, and quarterly Power BI dashboards highlighting KPIs such as resolution times and agent efficiency. - Enabled leadership to make data-driven decisions for support optimization.	
Call of Duty: Mobile (CODM) Analytics	Ongoing
- Designed end-to-end analytics system to track weapon, draw, and crate performance across LiveOps KPIs. - Built Tableau dashboards using Databricks ETL pipelines for centralized monitoring. - Created support systems to analyze player engagement, conversion, and revenue. - Delivered weekly executive presentations summarizing launches and business impact.	
Help Desk Data Analysis Project	1 Months

- Analyzed 9,542 support tickets and identified key gaps in resolution and satisfaction metrics.
- Highlighted low resolution rate of **13.45%** and high open-ticket volume of **71.66%**, enabling targeted improvement strategies.
- Designed Tableau dashboards to track categories, SLA trends, and customer satisfaction.

Education

B.C.A. | Computer Applications (General)
Bangalore University
Grade - 7/10

2022

Extra-curricular activities

Analytics Knowledge Sharing

Conducted internal knowledge-sharing sessions on SQL, dashboarding best practices and automation techniques to improve team capabilities and reporting standards.

Achievements

Key Contributions

Built dashboards and automation that delivered significant time savings in reporting and improved operational decision-making across support and LiveOps teams.
